RESPONSE TO REQUIREMENT UNDER 35 USC § 121

Applicant hereby elects Invention I with claims 1 - 9, drawn to a housing for bearing component.

Applicant respectfully traverses the requirement as the process is directly related to the claimed housing structure. Specifically, the process is for manufacturing a housing for receiving a bearing component includes forming the housing with shaft projection providing a hollow section and inserting a shaft projection into the recessed end area (see claims 10 and 13). Further, as the inventions are closely related, a single examination on the merits would be preferable. Each of the searches will involve similar areas with similar prior art being relevant.

BEST AVAILABLE COPY

Favorable consideration on the merits is requested.

Respectfully submitted  
for Applicant,

By.
